Signature Plating announces

Signature Plating of Cibolo Texas announces a new service that extends the care of decorative plated parts for aircraft owners, completion centers, MRO facilities and OEM's

SignaVantage covers and maintains the plating finish of installed and in-service aircraft interior parts for a period of 3-5 years depending on your customized plan. Aircraft interiors are expensive and are often unique to customer design input. SignaVantage helps to extend the interiors "new look" over time with periodic re-plating of high use and or damaged plated parts. Cupholders, ashtrays, seat belts (not including rewebbing etc.), coat hooks, and sinks are the most common items that show signs of regular use. The plating is worry-free and at no cost to the customer regardless of the issue or fault (removal, shipping, re-installation, and/or replacement parts additional), This SignaVantage service is available when the entire aircraft is originally plated by Signature Plating!

As parts become worn from typical use, they can be removed and returned to Signature Plating to have the plating restored to a new finish condition. The SignaVantage program allows aircraft interiors to always look their best.

About Signature Plating

Signature Plating is a full-service plating facility dedicated to producing the highest quality products with rapid turn times. The company's services include decorative plating, plastic plating, parts manufacturing, and anodizing for the aviation industry, as well as other VIP markets. If it can be plated, rest assured that Signature can do it — and do it well. For more information, please call 210.658.5599 or visit signatureplating.com.
